CRITERION B: RECORD OF TASKS

	CANDIDATE:				
TASK NUMBER	**PLANNED ACTION**	**PLANNED OUTCOME**	**TIME ESTIMATE**	**TARGET COMPLETION DATE**	**CRITERION**
1	Discussion with my advisor and client	Identify my client and advisor and discuss potential ideas to help solve the problem	1 hour	15/05/2020	A
2	Creation of my idea and thesis and a solution to the problem for my client	Plan main outcome of my program and a solution	½ hour	29/05/2020	A
3	Verification of idea and thesis and discussion with advisor	Approval of thesis and discuss any potential issues that could arise when making my program	½ hour	5/06/2020	A
4	Identifying suited programming language to create the program	Identify python as my main programming language	½ hour	5/06/2020	A
5	Develop a plan for proposed product and present to client	Identify any potential issues and verify the plan fits with my clients expectations	2 hours	8/06/2020	A/B
6	Start creating flowchart for program and outline main algorithms	Help with the organization and design of my program	2 hours	9/06/2020	B
7	Identify methods of testing for my program	Develop methods for testing to ensure that the program functions correctly	1 hour	10/06/20	B
8	Do research on certain functions needed for my	Identify needed functions and methods needed for	3 hours	12/06/2020	C

	program	my program			
9	Develop main source code and interface	Create source code and interface needed for client and the project	4 hours	13/06/2020	C
10	Continue working on code and testing for functionality and errors while writing it	Mainly finish the main program for testing	4 days	17/06/2020	C
11	Complete extensive testing and edit and improve areas of code as needed	Catch any errors and ensure proper functionality	1 day	18/06/2020	C/D
12	Allow my client to test the program and get feedback from my client	Ensure the program works properly and get feedback from client	4 hours	18/06/2020	D
13	Edit the program based off feedback from my client and adjust according to clients needs and give to client	Make sure the program is suited towards the wants of the client and user friendly	3 hours	19/06/2020	D/C/E
14	Evaluate my program and identify areas of improvement	Finish the evaluation of the program and the writing of improvements	3 hours	19/06/2020	E
15	Create website to display the process of creating the programming and a video of it functionality	Record a video and create a cover page for my project	1 day	20/06/2020	E/D
